## MACHINIST

---

**Canyon Composites, Inc.** is a robust aerospace fabrication and assembly company involved in all levels of prime spacecraft and aircraft manufacture. With a strongly supportive clientele such as Boeing Satellite systems, Northrop Grumman, General Dynamics, Ball Aerospace, and NASA we offer full service manufacturing for the most difficult exotic material flight structures.

### **Position Description:**

Canyon Composites has an immediate opening for a conventional machinist. A candidate for this position must have experience using conventional (manual) lathes & mills, producing parts to close tolerances. Must be able to work from drawings, use measuring tools, set-up & operate machines. Self-starter with positive attitude must work well in team environment. This position will be on a daytime shift from 7 AM to 3:30 PM Monday through Friday. Pay will depend on the extent of the candidates experience, knowledge and interview.

### **Applicants must:**

- Have a high-school diploma.
- Have a high degree of general craftsmanship and work ethic.
- Have a high skill level with close tolerance machining work on tool room equipment.
- Have excellent verbal and written English communication skills.
- Own setup and inspection tools.
- Be able to read and interpret ANSI Y14.5 blueprints and specifications.
- Provide a resume.

### **Recommended Skills:**

- Have a stable work history
- Have some knowledge of machining composites.

### **Salary and Workload:**

- Salary is negotiable based on experience at approximately \$15.00-\$22.00 / hr.
- Workload is 40 hr. / week. Expect overtime.
- Benefits include full medical, dental, vision, 401K.
